Systems & Data Automation: Advanced Microsoft Excel, Alteryx, TLM, Power BI (Basic), SQL (Foundational), Python (Foundational).

Professional Experience

Macquarie Group

Oct 2024 – Jan 2026

Senior Associate, Financial & Data Analysis

- Compressed monthly financial reporting cycles by 80% to 100%, consistently submitting critical closing packages 1 to 3 days after month-end using **Alteryx** and **TLM** workflows.
- Performed portfolio-level financial analysis across complex asset classifications to isolate performance trends and reconcile data anomalies.
- Maintained tight financial planning frameworks through systematic data validation and automated audit trails.
- Delivered structured, presentation-ready financial reporting models utilized directly by global internal stakeholders.
- Spearheaded operational process improvements to seamlessly bridge cross-functional financial data workflows.

Land Bank of the Philippines

Sep 2022 – Mar 2024

Accounts Assistant, Financial Review

- Accelerated reporting turnaround by 80% to 100% by finalizing comprehensive operational accounts review packets within 1 to 3 days post month-end.
- Audited balance sheets, general ledgers, and operational supporting document tracks to maintain ironclad regulatory compliance.
- Managed baseline budget parameters and executed deep-dive variance evaluations across multiple business accounts.
- Investigated structural ledger discrepancies and partnered with clearing units to correct operational recording variances.

Security Bank Corporation

Dec 2018 – Mar 2020

Operations Specialist

- Supervised rigorous data verification procedures to secure system integrity and reporting reliability.
- Compiled portfolio health datasets and maintained structural risk frameworks across production environments.
- Instituted control checkpoints that cut reporting errors and strengthened internal audit compliance metrics.

Accenture

Aug 2016 – May 2018

Transaction Processing Associate

- Executed high-volume financial transactions while exceeding quality thresholds and client SLAs.
- Governed comprehensive ledger entries and system uploads to guarantee transaction tracing audit-readiness.
- Collaborated with standardizing cohorts to streamline shared operational processing scripts.

Education

Bachelor of Science in Business Administration (Major in Financial Management) — Far Eastern University
